

PROJECT: The Grid 21 Kia Peng

CONSULTANT: Landscape

GBI RATING: Certified

PART	SUB-SECTION	#	DOCUMENTS REQUIRED FOR DA SUBMISSION	TARGET DATE	PROGRESS STATUS (e.g. Ready for collection, Processing, Expected date of completion etc.)	REMARKS
Sustainable Site Planning & Management (SM)	SM11 Heat Island Effect - Greenscape & Water Bodies	a	Site plan showing setback dimensions, outlines of building plinth, softscape and water bodies areas Indicate percentage of areas allocated for softscape and water bodies, out of total site area		Received	Require further clarification
		b	Landscape plan (softscape) showing the percentage area covered by native or adaptive vegetation		Received	Target to achieve 35%
		c	Name list of plants and characteristics		Received	
	SM13 Heat Island Effect - Hardscapes	a	Site plan showing the extent of proposed hardscapes. Indicate the percentage of hardscapes out of the total site area		Received	Require further clarification
		b	List of materials used for hardscapes and their characteristics, including SRI values		Received	Incomplete
	Water Efficiency (WE)					
	WE1 Water Efficient Landscaping	a	Calculation of amount of water required for landscape irrigation		Received	Require further clarification
		b	A short report by a landscape architect detailing the water efficient irrigation system (e.g. drip / sprinkler system coupled with rain sensor)			
		c	A report of native or adaptive plants in the design			
Innovation (IN)	IN1 Innovation in Design & Environmental Design Initiatives	1	Landscape plan (softscape) showing the percentage area of herb garden (to scale 1:500)		No design in the landscape plan	Provision of herb garden for at least 20m ² or 10% of total landscape area, whichever larger
		2	Name list of herb plants and characteristics
