1	<p><u>Green Area (Groundfloor) - 3000m2</u></p> <p>Requirement:</p> <p><i>Herb garden 10% of landscape area or 20sqm whichever higher.</i></p>				
a)	Trees -				
i.	<p><i>Lagerstomea langkawiensis</i></p> <p>A species of small tree in the family Lythraceae. Scattered in open lowland rainforest in areas of limestone, quartzite and shale. It is endemic to Langkawi Island, Western Malaysia.</p>	nos	170		
ii.	<p><i>Tabernaemontana divaricata</i></p> <p>Tabernaemontana divaricata is an evergreen shrub probably native to India and now cultivated throughout South East Asia and the warmer regions of continental Asia. In the Malay Peninsula a sweetened infusion of the leaves is used as a cough medicine, the pounded roots are applied externally for eye diseases (unspecified) and an unspecified part of the plant is mixed with other herbs to make a medicinal snuff for treating nasal ulcers.</p>	nos m2	300 341	6.59%	
b)	Shrubs				
i.	<p><i>Murraya paniculata</i></p> <p>Murraya paniculata is a tropical, evergreen plant native to South-Eastern Asia, Southern China, Taiwan, the Indian Sub-Continent and northern Australia, bearing small, white, scented flowers, which is grown as an ornamental tree or hedge. Traditionally, Murraya paniculata is used both in traditional medicine as an analgesic and for wood (for tool handles).</p>	m2	892	17.24%

ii.	<i>Pandanus amaryllifolius</i> Pandanus amaryllifolius is a tropical plant in the Pandanus genus, which is commonly known as pandan leaves , and is used widely in South Asian and Southeast Asian cooking as a flavoring.	m2	341	6.59%	
c)	Close Turfing				
i.	<i>Axonopus compressus dwarf (pearl grass)</i> Perennial, warm-season turfgrass, spreading by creeping stolons and underground rhizomes to form close-knit, coarse-textured lawn. Apparently a dwarf cultivar of Axonopus compressus (Cow Grass), up to 5cm in overall height.	m2	1800		
2	<u>Green Area (Podium-Level 9) - 1735m2</u> <i>Requirement:</i> <i>Herb garden 10% of landscape area or 20sqm whichever higher.</i>				
a)	Trees -				
i.	<i>Cratoxylum cochinchinensis</i> Native plant to Malaysia, Brunei Darussalam, China, Indonesia, Myanmar, Philippines, Singapore, Thailand and Viet Nam. Cratoxylum cochinchinense grows as a shrub or tree measuring up to 30 m tall with a diameter of up to 65 cm. The brown bark is smooth to flaky. The flowers are crimson. The fruits measure up to 1.2cm long. The trees are cut for derum timber.	nos	16		
ii.	<i>Caesalpinia ferrea</i> The very dense and durable wood of the leopard tree lends itself for use in general building and joinery. The tree is also used as a street tree in tropical climates. Traditionally, C. ferrea has been used for the treatment of diabetes mellitus, typically using a tea made from the stem. The fruits have also been used traditionally for the treatment of coughs and external injuries due to the species' believed anti-biotic qualities.	nos m2	37 44	0.85%

iii.	<p><i>Tabernaemontana divaricata</i></p> <p>Tabernaemontana divaricata is an evergreen shrub probably native to India and now cultivated throughout South East Asia and the warmer regions of continental Asia. In the Malay Peninsula a sweetened infusion of the leaves is used as a cough medicine, the pounded roots are applied externally for eye diseases (unspecified) and an unspecified part of the plant is mixed with other herbs to make a medicinal snuff for treating nasal ulcers.</p>	nos m2	90 120	2.32%	
b) Shrubs					
i.	<p><i>Wedelia trilobata</i></p> <p>The plant has use in traditional medicine: crushed leaves are used as a poultice; tea is given to alleviate symptoms of colds and flu; and it is used in combination with other herbs to clear the placenta after birth.</p>	nos m2	27000 100	1.93%	
ii.	<p><i>Bauhinia kockiana</i></p> <p>Bauhinia kockiana is a spectacular climbing bauhinia from Malaysia. Bright orange and yellow sprays of flowers are prolifically produced almost year round. It prefers a moist full sun position in slightly acidic soil. Grows as a woody sprawling climber so definitely needs some sort of support. B.kockiana grows well in tropical or warm subtropical climate.</p>	nos m2	1000 150		
iii.	<p><i>Acalypha siamensis</i></p> <p>Acalypha siamensis is a shrub or small scrambling tree. The plant is harvested from the wild for local use as a tea and a medicine. It is cultivated as a hedge in Thailand, Peninsular Malaysia and Indonesia.</p>	nos m2	2580 215	4.16%
